

DRAW THIS, BOSTON! from Greenway Artist, Chris Templeman Playful Perspectives: Imaginative Machines

Drawing inspiration from the objects and activities taking place on The Greenway, invent a robot to solve a problem!

1. What do you notice around you in the park? What troubles are people experiencing? What is something you could really **use** right now? What would make your park experience even better?
2. Using your imagination and inspiration, Invent a robot to help you meet these needs!

"I use 3D printers, a type of robot, to make art. But robots can do many other things. When I sketch, I use geometric shapes and draw rapidly (don't be afraid to scratch out or erase). I don't worry too much about the details of the sketch as my main goal is to get ideas onto paper quickly. I often use labels so I capture important details." -Chris Templeman, artist, *Make & Take*
